

WeYouMe

PEER TO PEER SOCIAL MEDIA

Outline - April 2019

Harrison Mclean - Lyndon Gasking

www.weyoume.io

The Problem.

Centralized social media companies have excessive power over human communication, and routinely abuse it.

Exchanges hold custodial control over user's assets, which are often hacked and frozen.

Marketplaces have high fees and sellers face chargebacks, and high transaction costs.

Content creators face widespread censorship, and usually do not earn any income for their contributions.

Personal information is amassed by central companies, to be sold and funnelled into invasive targeting algorithms.

An aerial night view of a city skyline, likely Dubai, featuring a complex highway interchange with multiple overpasses and ramps. The city lights are visible in the background, and the sky is a deep blue. The text "The Solution." is overlaid in a large, white, sans-serif font.

The Solution.

The future of social media and business should be decided by we, you and me.

WeYouMe is everything you know and love about social media, where everyone benefits.

WeYouMe is three revolutionary products, merged into one simple experience.

Blockchain social media, Decentralized Exchange and a Peer to Peer Marketplace.

WeYouMe makes it simple for everyone to earn rewards for their content, trade cryptoassets, and build digital businesses.

New bridge just opened up next to
the office.

WeYouMe offers everyone Freedom, Transparency, and Community. It is a new platform to help everybody to share information and value freely.

WeYouMe is a distributed Social media and business platform. That means it will let everybody post content about anything they want to, trade any digital currency, and create any digital businesses that they can imagine. WeYouMe is owned and operated by users, for users. People that have powerful computers can earn rewards for helping to run the WeYouMe network. Everybody that posts to WeYouMe will also earn rewards, depending on the amount of upvotes they earn from their community of viewers.

WeYouMe pays its users rewards using a special type of digital money called MeCoin. MeCoin is your coin. Users can commit to holding their MeCoin for a longer time to earn interest on their savings, and hold more voting power by converting it into MePower.

MeCoin is a new type of valuable currency, that is secured by its users on their own computers. Users that hold more value on the WeYouMe network by earning or purchasing MeCoin and have more voting influence. A certain amount of MeCoin is generated every year and divided between everyone that works to help WeYouMe grow and thrive. Anybody can earn MeCoin and manage it using their WeYouMe account. Nobody except the owner of an account can take or spend its MeCoin without permission. Nobody can create new MeCoin unless they contribute valuable time and resources to the network. Every owner of MeCoin can send it to other people for free, almost instantly. If you need to send money privately without everyone seeing where it is going, you can send it to another user secretly, using Stealth transactions.

WeYouMe helps everyone by sharing MeCoin widely and fairly. Everybody that already has some of the most important types of digital money will be given a small amount of WYM, which is a different coin that represents ownership of the network. Holders of this type of money will earn a small amount of all MeCoin that are ever created. Everybody that uses WeYouMe each day will earn a small amount of MeCoin for being a part of the community.

You can upload posts to WeYouMe of anything you want. You can post pictures, videos, music, books, software or any other files, and they will be saved and secured. Your posts can be listed on a board for the subject you want to talk about, and can bring people together to make a digital community. You get to choose who will be able to see them. If you select to post it publicly, it will always

be available to everyone, forever. If you post it privately, only the people you choose can view them. When you upload something, the people that see it can vote on it if they think it is good. The more people see your post, and think your post is good, the more rewards it will earn. People can even pay you money to unlock a special part of your post that you choose, and pay you tips directly. This lets everybody earn money from their posts, without needing to directly rely on advertisers. WeYouMe users can choose whether to use an account that is linked to their real-world identity to create a great reputation, to choose a nickname and post without revealing their real world identity, or to post without using any name at all.

MeCoin can be used to pay for anything you want to buy. You can buy other types of digital money on WeYouMe's trading system. You can even make your own new digital money and use it to represent anything you want. You can make a new type of digital money named after your company, or your project, and sell it to raise funds to help you achieve your goals. Your digital money can then be traded on WeYouMe by everyone, and used to allow your supporters to have a say in your decisions. You can automatically deduct a small amount of all the money you receive, and use it to pay rewards to your supporters, or even buy back your money from the exchange to repay them a fixed amount. This lets everybody make and trade their own assets, without requiring a big company to act as everybody's middleman.

You can buy and sell products on WeYouMe's marketplace. You can make a special account to represent your business, and list products that you want to offer customers. If you want some trustworthy people to secure your purchases, you can pay a small fee and have an independent group of mediators act as a middleman for the money, and make sure the trade is done correctly by both people. This makes sure that the buyer and the seller uphold their end of the bargain, without needing a big company to act as everybody's middleman.

The community chooses who the representatives of WeYouMe are. Everyone that holds voting power gets to choose the people that help the network operate. Anyone can become a part of the leading team of WeYouMe, by providing valuable services to the community, and campaigning to be elected. This encourages very skilled people to help WeYouMe grow and thrive, and rewards them for their important work. This means that anybody from any country can take an active role in the progress and services made available, and that the most passionate, hardworking, and skilled people are always able to rise to the top, regardless of the hiring policies and internal politics of any single company.

WeYouMe is different from the other social media networks you are used to. Big social networks are run on powerful computers owned by a single company. They control everyone's information, and can access all the private things you store on their websites. They make large amounts of money by using this information to choose which advertisements to show you. They deliberately make the website in such a way that maximises the amount of time you spend there, instead of showing you important and valuable content quickly. They usually do not pay you for uploading content, even though you are adding value to their website, and earning them money. With WeYouMe, everybody earns money for contributing to the community, and the files uploaded are stored securely, so that only you and the people you choose can read them. They are copied, sliced up, and spread out across the world on computers owned by many individuals, so that no one person can access private information without your permission, or stop you from posting content that they disagree with. Your WeYouMe account can never be banned or suspended from posting, no matter what views and opinions you have.

The WeYouMe platform earns money in a new and fair way. Big Social media companies try to keep you watching and browsing for as long as possible and target ads to cater to every piece of private information they have about you. With WeYouMe, most of your profile information is completely private, and promoted posts are targeted only to your public profile information. Everyone at WeYouMe can purchase a membership to disable promoted posts, and support the network directly. With a membership, you can earn access to a selection of free premium content, account benefits, fee discounts, and increased voting influence. Anyone can promote their posts and gain additional exposure for their content, or their business. The digital trading platforms have small trading fees, and special content payments have a small fee. The money that WeYouMe earns is returned directly to the platform's users, by buying MeCoin, lowering its supply, and increasing its price. This increases the earnings of every WeYouMe user.

Cutting edge technology is used to run WeYouMe. It allows every user of the platform to be able to see all the actions that take place and see the balances of all the people that earn from WeYouMe. This ensures that the platform is very transparent, and everybody can verify the flow of funds. The account used by the elected leaders of the platform to guide WeYouMe shows all payments it sends and receives to everybody. Everybody in WeYouMe is incentivised to work in the long term best interest of the platform, and those that are chosen by voters to act as representatives are accountable to all the users, all the time.
